# FIELD TRIAL REPORTS ON EFFICACY OF **SABUJ GOLD** AS AN ORGANIC MANURE ON DIFFERENT CROPS DONE FROM DIFFERENT UNIVERSITIES OF WEST BENGAL STATE, INDIA & KVK FARM IN WEST SIKKIM, INDIA.

## UTTAR BANGA KRISHI VISWAVIDYALAYA P.O. PUNDIBARI, DIST. COOCH BEHAR, PIN – 736165, WEST BENGAL, INDIA

NAME OF CROPS	SUMMARY & CONCLUSION
1) CAULIFLOWER	<p>It emerged conclusively from the present investigation on the project entitled “To evaluate the bio-effectiveness of <b>SABUJ GOLD</b> as an organic manure on vegetable crops”, that the organic manure <b>SABUJ GOLD</b> can be effectively consider as a good source of organic plant nutrition to the plant due to having significant positive effect in manifestation of commercial important traits viz, seedling vigor and health, earliness, less effected by pests &amp; disease infestation, better yield and good quality of agricultural produce attributes of the farm output at desired direction as sole organic practice and/or in combination with inorganic inputs (plant protection measures) other than nutrition. In present day’s context while the human health is a major concern, <b>SABUJ GOLD</b> as an organic manure can be consider as ideal replacement of inorganic fertilizers (conventional agricultural practice) with highly positive effect on yield as well as best exploitation of essential commercial quality parameters of the agricultural produce is highly recommended for its utilization in farmers field at commercial level to ensure the enhanced crop husbandry based net return.</p> <p style="text-align: center;"> Dr. Subhamoy Sikder Assistant Professor &amp; Principal Investigator Department of vegetable and spice crops Faculty of Horticulture Uttar Banga Krishi Viswavidyalaya P.O. Pundibari, Dist. Cooch Behar, West Bengal-736165</p> <p style="text-align: right;"> Director of Research Uttar Banga Krishi Viswavidyalaya P.O. Pundibari, Dist. Cooch Behar, West Bengal-736165</p>

## RAMAKRISHNA MISSION VIVEKANANDA EDUCATIONAL & RESEARCH INSTITUTE (RKMVERI)

RAMAKRISHNA MISSION ASHRAMA, NARENDRAPUR, KOLKATA - 700103, WEST BENGAL, INDIA

### NAME OF CROPS

1) CAULIFLOWER

2) CABBAGE

3) GREEN CHILLI

4) TOMATO

**SUMMARY :** This is to certify that **SABUJ GOLD** can be used as a good organic manure as well as ideal replacement of chemical fertilizer (conventional agricultural practice) as far as agricultural yield and adequate supply of plant nutrients are concerned.

**CONCLUSION :** **SABUJ GOLD** as an organic manure having significant positive effect in some important traits viz., germination, seedling vigor and health, earliness, less effected by pests and disease infestation and good quality of agricultural produce. **SABUJ GOLD** as an organic manure will generate more agricultural yields from the second year onwards compare to conventional agricultural yields by using chemical fertilizer (conventional agricultural practice).

# FIELD TRIAL REPORTS ON EFFICACY OF SABUJ GOLD AS AN ORGANIC MANURE ON DIFFERENT CROPS DONE FROM DIFFERENT UNIVERSITIES OF WEST BENGAL STATE, INDIA & KVK FARM IN WEST SIKKIM, INDIA.

## KVK FARM, WEST SIKKIM, STATE SIKKIM, INDIA

### TECHNICAL FIELD TRIAL REPORT

"TO EVALUATE THE PERFORMANCE & YIELD EFFICIENCY OF "SABUJGOLD" AS ORGANIC MANURE WITH SUFFICIENT AND COMPLETE SOURCE OF PLANT NUTRIENTS FOR MAIZE CROP IN SIKKIM".

LOCATION : Yangthang Village, West Sikkim.

TRIAL PERIOD : April 2020 to August 2020.

1. PLOT SIZE (A) : 0.1 Hectare.

NAME OF THE FARMER : HOM BDR CHETTRI

VARIETY OF MAIZE SEED USED: RCM1-1

1. PLOT SIZE (B): 700 sq m

Crops experiments : Red Cherry pepper (Dahle Khorshani).

Location : KVK, farm Geyzing.

#### CULTIVATION TECHNOLOGY:-

SABUJGOLD (Organic Manure) and NEEMKHOL, both supplied by ORGANIC AGRO INDIA, Kolkata, West Bengal.

CONDUCTEDBY: KVK, Geyzing (West Sikkim) in collaboration with ORGANIC AGRO INDIA, Kolkata, West Bengal.

OBJECTIVES OF THE PROJECT: - To evaluate the efficiency of SABUJGOLD (Organic manure) in terms of Soil health, plant health and yield pattern on Maize and Red Cherry Pepper in Sikkim.

  
Subject Matter Specialist  
Agri. Agronomy  
K.V.K. Gyalshing, W. Sikkim

Gyalshing, West Sikkim

### SUMMARY:

ON APPLICATION OF SABUJ GOLD AS ORGANIC MANURE HAVE SIGNIFICANT POSITIVE EFFECT ON IMPORTANT TRAITS VIZ: GERMINATION, SEEDLING VIGOR AND PLANT HEALTH, VEGETATIVE GROWTH, NO PESTS AND DISEASES INFESTATION AND GETTING HIGHER YIELD AND GOOD QUALITY PRODUCT.

### RECOMMENDATION:

THIS IS TO CERTIFY THAT SABUJ GOLD AS ORGANIC MANURE SHOULD BE USED AS AN IDEAL REPLACEMENT OF FYM (CONVENTIONAL AGRICULTURAL PRACTICE) IN SIKKIM TO GET HIGHER AGRICULTURAL YIELD ALONG WITH GOOD QUALITY OF AGRICULTURAL PRODUCE. IT IS ALSO REQUIRED VERY LESS LABOUR AND COST EFFECTIVE THAN THE LOCAL METHODS PRACTISED IN SIKKIM. THIS MANURE IS MUCH BETTER QUALITY AND HAS MORE ADAPTABILITY TO THEIR PLACES ALSO AND NO ANY INCIDENT OF PESTS AND DISEASES FOUND IN TESTING FIELD DURING THE WHOLE CULTIVATION PERIOD FROM SOWING TO HARVESTING.

# TEST REPORT ON WATER HOLDING CAPACITY OF SABUJ GOLD ON DIFFERENT TEMPERATURES AND DAYS INTERVAL

Certificate No.: G(S)-(NN)/20-21/1900 Dated: 10.11.2020  
SAMPLE SUBMITTED BY PARTY : Page - 1 of 1  
Name of Client : M/S. ORGANIC AGRO INDIA  
Address : 18A, Prince Gulam Mohammad Road,  
: 1st Floor, Kolkata - 700026  
Description of Sample : Organic Manure  
Mark on Sample : SABUJ GOLD (Organic Manure), 150 gm  
Sample Received on : 12.10.2020  
Analysis Started on : 27.10.2020  
Analysis Completed on : 10.11.2020

A. MEASURE OF WATER HOLDING CAPACITY					
Sl. No.	Days	Temperature	Unit	Water Holding Capacity	Test Method
1	1st to 3rd day	20°C	%	95.03	F.C.O. 1985 (as amended upto January 2019)
2	4th to 6th day	25°C	%	83.84	
3	7th to 9th day	30°C	%	73.37	
4	10th to 15th day	35°C	%	58.18	

Note: F.C.O. - Fertilizer Control Order  
Remark : Sabuj Gold (Organic Manure) has more than 50% water holding capacity upto 15 days from the date of application of irrigation in agriculture field. This may thus reduce the quantity needed for irrigational water and its expenses by conserving more water.

## WATER HOLDING CAPACITY AT FIXED TEMPERATURE 15 DEGREE CENTIGRADE AND DAYS INTERVAL

## COMPOSITION :

**SABUJ GOLD** contains Vermicompost, various organic ingredients along with essential microbes & Organic Macro & Organic Micro Nutrients.

### DOSE:

Use 750 kg of **SABUJ GOLD** per Hectare of land.

(During preparation of agricultural field use 500 kg of **SABUJ GOLD** per Hectare of land. After 45 to 50 days from the first application apply remaining 250 kg of **SABUJ GOLD** per Hectare of land).

- Use 750 kg of **SABUJ GOLD** per Hectare of land for 1st year. (500 kg during preparation of soil and 250 kg after 45 to 50 days from the first application)
- Use 500 kg of **SABUJ GOLD** per Hectare of same land for 2nd year. (250 kg during preparation of soil and 250 kg after 45 to 50 days from the first application)
- Use 250 kg of **SABUJ GOLD** per Hectare of the same land for 3rd year. (125 kg during preparation of soil and 125 kg after 45 to 50 days from the first application)
- Use only 250 kg of **SABUJ GOLD** per Hectare on the same land for subsequent years afterwards.

### APPLICATION PROCESS :

1. Apply 125 kg of **NEEM PURE** (Pure Neem Khol) per Hectare of land & then ploughing of land is to be done to turn the soil upside down and downside up and loosening it until the soil and Neem Khol turns into uniform mixture and in more or less powder form in nature (1st time).
2. After 7 days again tilling (2nd time) is done to make the soil more powdery in form and this loosened soil allows the roots to penetrate deep into the soil and to breathe easily. It also supports the growth of earthworms & microbes.
3. After 3 days apply **SABUJ GOLD** in the entire field and criss-cross tilling is done to get the manure uniformly mixed with the soil. Apply water to keep the manure in moist condition as per requirement.
4. After 2 days again tilling (3rd time) is done to mix the manure on the entire field. Then create channels (horizontally or vertically). Keep spraying water on the soil everyday for 3 days to keep the land in moist condition (minimum 20 % to 30 % moisture). Then land is ready for sowing of seeds or seedlings. It will help in quick germination of seeds.

#### N.B.:

1. After mixing **SABUJ GOLD** the soil must be maintained in moist condition.
2. Get best result for **SABUJ GOLD** between 10 degree centigrade to 40 degree centigrade temperature.
3. To get best result from **SABUJ GOLD** use our product **MAGIC GOLD** after 40 days from sowing of seeds or seedlings with an interval of 25 days apart till harvesting of the crops.

# IMPORTANT FEATURES OF SABUJ GOLD

**SABUJ GOLD** (Organic Manure) HAS MORE THAN 50% WATER HOLDING CAPACITY UPTO 15 DAYS FROM THE DATE OF APPLICATION OF IRRIGATION IN AGRICULTURAL LAND. THIS REDUCES THE QUANTITY OF WATER NEEDED FOR ORGANIC CULTIVATION & TO CONSERVE MORE WATER FOR IRRIGATION.

**SABUJ GOLD** WILL REJUVENATE THE HEALTH OF SOIL AND RETRIEVE BACK FERTILITY OF SOIL TO IT'S PREVIOUS ORIGINAL FORM.

**SABUJ GOLD** APPLICATION ON SOIL WILL ENSURE VERY LESS INFESTATION OF PESTS AND DISEASES IN PLANTS AND KEEPS THE PLANTS IN HEALTHY CONDITION THROUGHOUT THE FULL CROP CIRCLE.

APPLICATION OF **SABUJ GOLD** PROVIDES PLANT WITH COMPLETE NUTRIENTS TO DEVELOP SUFFICIENT AMOUNT OF HIGH QUANTITY AGRICULTURAL YIELDS AS PER CONVENTIONAL CULTIVATION WITH CHEMICAL FERTILIZER AND HIGH QUALITY AGRICULTURAL PRODUCE.
